Abstracts

Impact damage from hard wheeled moving loads can take its toll on the slab, typically resulting in floor joint damage and surface defects. As well as operational wear and tear on the floor slab, a change of layout involving the moving of equipment and pallet racking will generally bring about a requirement for the floor to be repaired.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
