## Abstracts

A snoring chin strap (chin strap or anti snoring chin strap) is a device normally made from a flexible fabric or neoprene type material that is placed under your chin and wraps over your head, supporting your chin and essentially keeping your mouth closed whilst you sleep.

In theory, it works by supporting your chin during sleep, which in turn keeps your mouth closed. This prevents air from traveling to and from your throat and over the tongue and soft palate, therefore minimizing the rapid flapping of that is the primary cause of the sound that snorers make. If you are a Nose Snorer then a chin strap may not be the ideal choice for you as, by design, it primarily works best for Mouth Snorers.
