Spectrum Analyzer is a measuring instrument that displays electrical signals based on their frequency. Each frequency component contained in the input signal is displayed as a signal level corresponding to that frequency. The spectrum analyzer measures the amplitude and frequency of the input signal over the full frequency range of the instrument.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Spectrum and Signal Analyzers market in 2020.
