Abstracts

Speed Inline Skates are a type of roller skates used in the most common in-line skating. Unlike roller skates with two front and two rear wheels, inline skates usually have two to five wheels arranged in a single row. Some, especially those used for entertainment, have rubber 'stop' or 'brake' pads attached to the back of one or two skates so that the skater can slow down or stop by braking the skates against the feet. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
