## Abstracts

Theater drapes and stage curtains are large pieces of cloth that are designed to mask backstage areas of a theater from spectators. They are designed for a variety of specific purposes and come in several types; many are made from black or other dark colored, light-absorbing material, and heavyweight velour is the current industry standard for these. Theater drapes represent a portion of any production's soft goods, a category which includes any cloth-based element of the stage or scenery (though not including cloth theater costumes or wardrobe). Theater curtains are often pocketed at the bottom to hold chain to weight them down so that they move less or to accept pipes to remove their fullness and stretch them tight.

In proscenium theaters, drapes are typically suspended from battens that are controlled by a fly system, comprising (i.e., they are 'flown', in theater terminology). When a drape is flown, the task of adjusting its height for best masking effect is simplified and, in the case of a drape that must be moved during a performance, this enables the drape to be quickly raised above the proscenium arch—thus positioning it out of view of spectators—or lowered to any arbitrary height above the stage, as required. With such a system, drapes are not flown up and down, but rather out and in, respectively.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Theater Drapes and Stage Curtains market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events

restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
