## Abstracts

Critical data is often vulnerable to multiple threats that are persistent, advanced, and complex. These threats threaten the safety of the company. In order to protect this data, a threat intelligence and security service were used. A security service is an organization's ability to evaluate and understand information related to all types of cyberattacks. Organizations are increasingly investing in threat intelligence and security services to protect corporate data from multiple and complex threats.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Threat Intelligence Security market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
