The equipment installed on the track chain system is called the track installation equipment. Crawler-type equipment facilitates the movement of heavy mining and construction equipment that is normally stationary. Therefore, they are also known as mobile devices. Mobility enables the same device to be used for a variety of applications on different sites. Various types of crawler equipment include crawler jaw crusher, crawler movable screen, crawler conveyor, crawler impact crusher and crawler loader. In addition, crawler units operate through direct, hydraulic or electrically driven power transfer. The equipment uses diesel engines to generate electricity. In addition, all the different crawler units have separate fuel tanks, hydraulic tanks and hydraulic hoses.
