E-commerce in automotive is starting to penetrate spare parts and vehicle purchases, with implications for OEMs, dealers, LSPs and customers

In the early days of eBay and Amazon, consumers marvelled at their own boldness.

Buying on the internet was a step into the unknown: sending money to strangers to purchase items that they hadn't seen and couldn't touch. Fifteen years on, e-commerce no longer seems so alien. Checks and balances serve to keep buyers and sellers honest while transaction feedback mechanisms reinforce good behaviour.

That said, e-commerce remains the exception for the second largest purchase many consumers will make, after their house or apartment: a new, or nearly new, car.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Used-car Trading E-commerce market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Used-car Trading E-commerce industry.

Based on our recent survey, we have several different scenarios about the Used-car Trading E-commerce YoY growth rate for 2020. The probable scenario is expected to
