Abstracts

Vegan Food is a type of vegetarian diet that excludes meat, eggs, dairy products and all other animal-derived ingredients. Many vegans also excludes foods that are processed using animal products, such as refined white sugar and some wines.

Growing awareness about animal health and animal cruelty in the food industry has been encouraging people to shift from animal-based to plant-based food products.

Increasing awareness about the benefits of following vegan diet is the key factor responsible for the growth of this market.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Vegan Food market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Vegan Food industry.

Based on our recent survey, we have several different scenarios about the Vegan Food YoY growth rate for 2020.
