Abstracts

Wasabi Powder is, in theory, a hot-tasting powder made from the dried, ground roots of Wasabi plants. Wasabi powder can be distinguished by its light lime coloring and sharp, hot taste and aroma. Most of the Wasabi powder that it sold internationally is not actually genuine Wasabi but instead a mix of mustard, horseradish and color additives. The reason for this is the high cost and scarcity of Wasabi root. For the true Wasabi aficionado there is no substitute for real Wasabi root that has been ground into powder. One of the big advantages Wasabi powder has over fresh Wasabi root is its relatively long shelf life. Provided that Wasabi powder is stored in a cool, shaded location, it will retain its taste. Wasabi powder can also be easily transformed into paste, as well as being used as a spice in cooking. Wasabi powder is often used as substitute for Dijon mustard.
