Abstracts

Shades are “soft” window treatments which are made of materials on a continuous roll to cover a large swath of a window opening, fitting snugly into your window and stacking neatly at the top. Shades are drawn up and down by cords or rolled up with a spring device. Shades have no slats or vanes and offer a smooth look to your windows; hence, they are called soft window treatments as the fabric and feeling of the shade is warm and flowing. Although you cannot adjust for light filtering, as with blinds, you can choose different levels of opacity for light preferences. Roller Shades, Roman Shades and Cellular Shades are the most popular “shades,” with cellular shades topping the list as a favorite window treatment.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Window Shade market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Window Shade industry.

Based on our recent survey, we have several different scenarios about the Window Shade YoY growth rate for 2020. The probable scenario is expected to grow by a xx%

in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019. The market size of Window Shade will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.
