## Abstracts

Wine bags are only used for packaging items solely utilized for safe covering and transport of expensive wine and related wine packaging items. Glass is the most widely used material and is the most popular wine container, so it is important to use light, strong wine bags to facilitate the safe transport of high-priced bottles from the wine store. In the current situation, the wine bag has become a luxury item rather than a protective cover for carrying wine. Traditionally, wine bottles were given as gifts among the upper middle classes, and the packaging of a bottle with a wine bag added to the luxury and aesthetic value of the wine. The wine bag is no different from other ordinary commodity packaging. The design of the wine bag takes particular account of the bottle size and shape. The bags are usually sold on the market with the bottles or can be purchased as stand-alone products for more personalized use by customers. Bespoke bags are also becoming more popular in the market, leading sellers to offer custom bags to customers.
