Abstracts

We define the wired and wireless access LAN Infrastructure market as comprising vendors supplying wired and wireless networking hardware and software that enables devices to connect to the enterprise wired LAN or Wi-Fi network. These devices may include: Laptops, Smartphones, tablets and other mobile smart devices, Networked office equipment, Sensors and other Internet of Things (IoT) endpoints, Other fixed or mobile devices communicating to a wired switch port or a wireless access point (AP) at the edge of the enterprise infrastructure. This market does not cover wired and wireless access networking infrastructure for adjacent markets such as public venues; small office/home office; commercial and industrial settings; or point-to-point solutions. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Wired and Wireless LAN Access Infrastructure market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
