Abstracts

A public cloud is one based on the standard cloud computing model, in which a service provider makes resources, such as applications and storage, available to the general public over the Internet. Public cloud services may be free or offered on a pay-per-usage model.

A form of cloud computing in which a company relies on a third-party cloud service provider for services such as servers, data storage and applications, which are delivered to the company through the Internet. A public cloud can free companies from the potentially expensive costs of having to purchase, manage and maintain on-premises hardware and software infrastructure.

This report studies sales (consumption) of Public Cloud in Europe market, especially in Germany, UK, France, Italy, Spain and Russia, focuses on top players in these regions/countries, with sales, price, revenue and market share for each player in these regions, covering
