Abstracts

1,2-Butadiene (CAS 590-19-2) is an allenic olefin which is mainly used as a process additive, e.g. for synthetic rubber. The substance is a highly flammable gas which is used as a specialty chemical in polymer and chemical industry.

According to QYResearch's new survey, global 1,2-Butadiene market is projected to reach US\$ million in 2029, increasing from US\$ million in 2022, with the CAGR of % during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole 1,2-Butadiene market research.

1,2-Butadiene, commonly known as butadiene, is a significant petrochemical raw material extensively used in the synthesis of rubber, resins, plastics, and other products. In recent years, with the growth of the global automotive industry and consumer goods market, the butadiene market has shown robust expansion. However, the pressures of environmental protection and sustainable development are also driving the industry towards more eco-friendly production processes and materials. Therefore, the future of the butadiene market will continue to focus on technological innovation and sustainability, seeking broader application areas.
