Abstracts

This report studies the global 1,2,4-Trimethylbenzene market status and forecast, categorizes the global 1,2,4-Trimethylbenzene market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

1,2,4-Trimethylbenzene, a flammable colorless liquid with a strong odor, occurs naturally in coal tar and petroleum. It is a major component (typically 40%) of a petroleum refinery distillation fraction known as the C9 aromatic fraction (or simply the C9 fraction).

Trimellitic anhydride is the largest application of 1,2,4-trimethylbenzene, others applications include mesitylene and so on. With increasing demand from downstream industry, 1,2,4-trimethylbenzene production shows continuous upward trend in the recent few years. FHR, Eni, Jiangsu Zhengdan, Nanjing Refinery and so on are among of key players in 1,2,4-trimethylbenzene industry at the moment.

Compared with foreign giants, 1,2,4-trimethylbenzene produced by Chinese manufacturers still has a certain performance gap. Chinese 1,2,4-trimethylbenzene manufacturers should be dedicated to improving their technology and narrowing down the performance gap with foreign giants. Besides, stimulated by downstream demand, 1,2,4-trimethylbenzene production in China will be released further in the coming years as some companies have add investments on their 1,2,4-trimethylbenzene businesses. We tend to believe that this industry still has a bright future, considering the current demand. As for product prices, the slow downward trend in recent years will continue in the next few years, since competition intensifies. Similarly, there will be fluctuations in gross margin.

The global 1,2,4-Trimethylbenzene market is valued at xx million US\$ in 2017 and will

reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
