## Abstracts

2-Ethylhexyl methacrylate (2-EHMA), is a main methacrylic ester and polymerizable monomer.

2-EHMA is produced for the use as a building block to make a wide range of polymer based products that we see and use every day from paints and coatings, toners and inks, oil additives to dental and medical products to name but a few. 2-EHMA is of low concern to human health and the environment. It is classified as hazardous (skin irritant and sensitizing) but has been handled safely by industry and professionals for over 60 years.

2-Ethylhexyl methacrylate, a colorless transparent liquid, is mainly manufactured by methacrylic acid or methyl methacrylate reacting with 2-ethylhexanol. Due to its outstanding performances, 2-Ethylhexyl methacrylate is widely used in many industries, such as paints and coatings, adhesive and sealants, fiber treatment agent industry and so on.

Among those applications, paints and coatings is the largest consumption field, which contributed 52.26% share in 2015.

According to its manufacturing process, 2-ethylhexyl methacrylate can be got from methacrylic acid esterification or methyl methacrylate transesterification. Since price of methacrylic acid is higher than that of methyl methacrylate, 2-EHMA manufacturers prefer to adopt methyl methacrylate transesterification method to produce 2-EHMA. Europe and Japan are the major production bases of 2-ethylhexyl methacrylate. Europe keeps its No.1 place in the global production market in recent years. In 2015, European capacity was about 7450 MT, holding 33.23% share. Japan is the follower, who had 7100 MT 2-ethylhexyl methacrylate capacity in 2015.

As for consumption, Europe is the largest consumer as well. Global consumption volume of 2-ethylhexyl methacrylate was 17219MT in 2015, while Europe consumed about 5172MT 2-ethylhexyl methacrylate. The second largest consumer is USA, whose

consumption volume was 4135 MT in 2015.

Considering its applications and alternatives, the 2-ethylhexyl methacrylate market size is not large with some manufacturers engaged in the industry. Demand from downstream industries sets obstacles for the industry. It is estimated that the whole 2-ethylhexyl methacrylate market will keep the current softening situations with gradually increasing size.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the 2-Ethylhexyl Methacrylate 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the 2-Ethylhexyl Methacrylate 3900 industry.
