Abstracts

Adhesive Bandages, also known as sticking plaster, is a small medical dressing used for injuries not serious enough to require a full-size bandage. The adhesive bandage protects the wound and scab from friction, bacteria, damage, and dirt. Thus, the healing process of the body is less disturbed. Some of the dressings have antiseptic properties. An additional function is to hold the two cut ends of the skin together to make the healing process faster.

Adhesive bandages are applied on the patients who have not undergone serious accident but have minor abrasion (scratches) and cut on their body. The downstream users are normally different ages of people.
