Abstracts

This report studies the global Advanced Phase Change Materials (PCM) market status and forecast, categorizes the global Advanced Phase Change Materials (PCM) market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa). Phase change materials (PCMs) are substances with a high enthalpy of fusion, also known as latent heat, meaning they can store large quantities of heat energy as they change phase. When melting, they absorb heat and maintain the temperature of the environment at a certain value until completely molten. When the temperature of the environment falls below the crystallisation temperature, the PCM will start to solidify, releasing large quantities of heat and maintaining the temperature until completely solid. In consumption market, the growth rate of global consumption is stable. USA? Europe? China? Japan? Southeast Asia? India are still the mainly consumption regions, due to the advanced production technology and rapid development of economy.

The global Advanced Phase Change Materials (PCM) market is valued at 850 million US\$ in 2017 and will reach 2150 million US\$ by the end of 2025, growing at a CAGR of 14.1% during 2018-2025.
