Abstracts

Aviation fuels are petroleum-based fuels, or petroleum and synthetic fuel blends, used to power aircraft. They have more stringent requirements than fuels used for ground use, such as heating and road transport, and contain additives to enhance or maintain properties important to fuel performance or handling. They are kerosene-based (JP-8 and Jet A-1) for gas turbine-powered aircraft. Piston-engined aircraft use gasoline and those with diesel engines may use jet fuel (kerosene). This report mainly focuses on aircraft refueling vehicles market.

According to QYResearch's new survey, global Aircraft Refueling Vehicles market is projected to reach US\$ 466.3 million in 2029, increasing from US\$ 412 million in 2022, with the CAGR of 1.8% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Aircraft Refueling Vehicles market research.

Asia-Pacific held a key market revenue share of the Aircraft Refueling Trucks market in 2022. The increasing adoption of Aircraft Refueling Trucks is expected to offer lucrative opportunities for vendors. In 2022, SkyMark, Westmor Industries, BETA Fueling Systems ranked top 3 of the revenue share in global market. These companies will witness a stable growth in the following five years. Market opportunities and challenges coexist. Aircraft refueling plays an integral part in the course of airline operations. Aircraft refueling trucks are used to fuel the aircraft tanks with aviation fuels used to provide power to the flights along with pressure control, ladder brackets, refueling system, hoses, chassis, and others. Aircraft refueling plays an integral part in the course of airline operations. Emergence of aircraft manufacturers to match up with growing demand for aircrafts is considered to increase the growth of refueling tracks as well and

henceforth is driving the aircraft refueling trucks market.
