When a patient's airway is at risk for obstruction or becomes obstructed, an artificial airway is inserted to maintain airway patency. Some common devices used for this purpose are endotracheal tubes and laryngeal mask airway, among others, such as Guedel airway, tracheostomy tubes, etc.

USA is the largest consumption area of Airway management devices industry, accounting for around 29% of global volume and 43% in terms of revenue.

Besides USA, Europe is the second largest consumption market, accounting for 37% of global revenue and 25% in terms of volume.

Leading manufacturers are Teleflex/LMA, Medtronic, Ambu and Intersurgical.

Concentration rate of top 4 is 68% in 2015.

In general, the market concentration is relative high, as bulk purchase is the majority market status. Though the giants have occupied considerable market share, there are still a large quantity of manufacturers of Airway management devices with small capacity around the world.

Although sales of Airway management devices brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the Airway management devices field.
