Abstracts

Albumin is a water-soluble globular protein produced in the liver. It accounts for 50% of blood plasma proteins. These play a vital role in regulating blood volume and act as transporters for molecules such as few hormones, bile salts, and ions. Albumin is commonly used as blood volumizer in rare diseases, burns, shocks, liver conditions, and other blood loss trauma and surgeries.

According to QYResearch's new survey, global Albumin Excipient market is projected to reach US\$ 6626.2 million in 2029, increasing from US\$ 4340.4 million in 2022, with the CAGR of 6.1% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Albumin Excipient market research.

The industry's leading manufacturers are Grifols, CSL and Takeda, which accounted for 20.39%, 15.19% and 14.36% of global revenues in 2019.

By region, Asia-Pacific is the largest consumption market of Albumin (as Excipient), with its sales volume at 70.83%.
