## Abstracts

The risk of kidney failure and diseases are rising globally. The delay in diagnosis of kidney diseases and busy lifestyles are putting people at the risk of increasing chronic diseases. The need for albumin tests for the CKD then plays an even important role and leads to high market valuation. The tests help in detecting kidney disease (mostly in individuals suffering from hypertension and diabetes) at an early stage and also detects the level of albumin present in the urine.

According to QYResearch's new survey, global Albumin and Creatinine Test market is projected to reach US\$ 1078.1 million in 2029, increasing from US\$ 639 million in 2022, with the CAGR of 7.8% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Albumin and Creatinine Test market research.
