Abstracts

Aluminum-zinc coating is an alloy metal, in which the aluminum content is 55%, and the zinc content is 43.5%, with remaining component being silicon. Generally, the corrosion resistance of aluminum-zinc coating is 2-6 times better than pure zinc coating of the same weight. The surface of the galvanized steel coil can be modified by production technology to produce beautiful and uniform spangles, which can be directly used for exterior building or household appliances.

According to QYResearch's new survey, global Aluminum-Zinc Alloy Coated Sheet Steel market is projected to reach US\$ 2215.6 million in 2029, increasing from US\$ 1536 million in 2022, with the CAGR of 5.4% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Aluminum-Zinc Alloy Coated Sheet Steel market research.

The steel industry is the core of global economic development, and the core of the sustainable development of modern society. In 2022, China's steel production declined year-on-year. In the first 11 months of 2022, China's crude steel production was 935 million tons, down 1.4% year-on-year, while steel production was 1.226 billion tons, down 0.7% year-on-year. Combined with the statistics of the Steel Association's ten-day report, it is expected that China's crude steel output for the whole year of 2022 will be 1.01 billion to 1.02 billion tons, down about 2% year-on-year. In the international market, global steel production declined year-on-year, and the global share of China's crude steel output increased. According to the World Steel Association, in the first 11 months of 2022, global crude steel production was 1.691 billion tons, down 3.7% year-on-year; the global share of China's crude steel production was 55.29%, up 1.31 percentage

points year-on-year. According to the steel demand forecast released by the World Steel Association, global steel demand may grow by 1.0% in 2023.
