This report studies the global Ammonia market status and forecast, categorizes the global Ammonia market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Ammonia, a colourless and nonflammable gas with a characteristic pungent smell, is a compound of nitrogen and hydrogen with the formula NH_3 . Ammonia is shipped as a liquified gas under its own vapor pressure of 114 psig. Most extensive use is in soil fertilization. This application is used in the form of salts, nitrates and urea.

According to the statistics, ammonia industry concentration is relatively low. The top ten manufacturers were counted for about 18.19% production market share in 2015. In this report, we list the top twenty-eight enterprises including Yara? CF Industries? Agrium? Group DF? Qafco? PotashCorp? TogliattiAzot? Eurochem and Acron etc.

Geographically, the production regions of world ammonia include North America, Europe, Middle East, India and China etc. China was definitely the major production region, which dominated the market with 34.84% production market share in 2015. However, the production concentration is very fragment in China with hundreds of small enterprises located throughout China. Europe, North America was the other two players with 10.09% and 9.31% production market share respectively in 2015.

As for the raw materials of ammonia, there is an obvious difference between China and other regions. In China, majority of enterprise use the coal, which is estimated account for 85%. While in Europe and North America etc. regions, the natural gas is the major raw materials due to the abundant natural gas resources in local.

The global Ammonia market is valued at 71200 million US\$ in 2017 and will reach 77400 million US\$ by the end of 2025, growing at a CAGR of 1.1% during 2018-2025. The major players covered in this report
