Abstracts

The 2016 Market Research Report on Global Ammonium Thiosulfate Industry is a professional and in-depth study on the current state of the Ammonium Thiosulfate industry.

Firstly, the global ammonium thiosulfate industry revenue had reached to 166.02 Million USD in 2015 and is expected to grow at a CAGR of 1.08% % from 2016 to 2021.

Secondly, the report provides a basic overview of two type ammonium thiosulfate including power and liquid ammonium thiosulfate. In this report, statistics mainly focus on anhydrous (100%, solid) ammonium thiosulfate. The enterprise data is converted from actual liquid production and certain content of solids. It also covers the various applications in induration and agricultural. In the past the ammonium thiosulfate is mainly used in the graphic printing chemicals, now is also used in the metal cleaning agent, plating solution and reducing agent, and coupled with the development of digital camera, the application share of the graphic printing chemicals is declining, the fertilizer market demand will be increasing in the next few years.

Thirdly, report also states import/export, supply and consumption figures as well as cost, price, revenue and gross margin by regions (US, Europe, South America and China), and other regions can be added. In addition, the report focuses on global major leading industry players with information such as company profiles, product picture and specification, capacity, production, price, cost, revenue and contact information. Upstream raw materials, equipment and downstream consumers analysis is also carried out. What's more, the ammonium thiosulfate industry development trends and marketing channels are analyzed.

Finally, the feasibility of new investment projects is assessed, and overall research conclusions are offered.

In a word, the report provides major statistics on the state of the industry and is a valuable source of guidance and direction for companies and individuals interested in the market.
