## Abstracts

Anaerobic digestion is a process in which microorganisms break down biodegradable material in the absence of oxygen. It can be used to process a wide range of organic material, from food waste and grass to waste paper and animal waste.

An Anaerobic digester is an air tight container that breaks down biodegradable waste such as feedstock, sewage sludge & food wastes and turns the waste products into readable bi-products of Biogas and digitate in an environmentally friendly way.

This report we mainly researched the anaerobic digester that handled the Industrial fields and wastewater treatment.

Direct marketing is about making direct contact with existing and potential customers to promote the products or services. Direct marketing can be cost effective and extremely powerful at generating sales, so it is ideal for small businesses.

Direct marketing allows you to generate a response from targeted customers. As a result, small businesses can focus their limited marketing resources where they are most likely to get results.

A direct marketing campaign with a clear call to action can help you boost your sales to existing customers, increase customer loyalty, recapture old customers and generate new business.

In the Anaerobic Digester industry, direct marking only ccupies most shares.12.1.2

### Indirect Marketing

Indirect marketing is where there is no direct communication to end consumers by companies. It is treated as the next step for establishing brand recognition and awareness. Manufacturers use indirect marketing when selling through wholesalers and other channels.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019

(COVID-19) are already starting to be felt, and will significantly affect the Anaerobic Digester 4900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Anaerobic Digester 4900 industry.
