This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Anaerobic digestion is a process in which microorganisms break down biodegradable material in the absence of oxygen. It can be used to process a wide range of organic material, from food waste and grass to waste paper and animal waste.

An Anaerobic digester is an air tight container that breaks down biodegradable waste such as feedstock, sewage sludge & food wastes and turns the waste products into readable bi-products of Biogas and digitate in an environmentally friendly way.

This report we mainly researched the anaerobic digester that handled the Industrial fields and wastewater treatment.

Direct marketing is about making direct contact with existing and potential customers to promote the products or services. Direct marketing can be cost effective and extremely powerful at generating sales, so it is ideal for small businesses.

Direct marketing allows you to generate a response from targeted customers. As a result, small businesses can focus their limited marketing resources where they are most likely to get results.

A direct marketing campaign with a clear call to action can help you boost your sales to existing customers, increase customer loyalty, recapture old customers and generate new business.

In the Anaerobic Digester industry, direct marketing only occupies most shares.

12.1.2 Indirect Marketing

Indirect marketing is where there is no direct communication to end consumers by companies. It is treated as the next step for establishing brand recognition and awareness. Manufacturers use indirect marketing when selling through wholesalers and

other channels.

The global Anaerobic Digester market is valued at 100 million US\$ in 2017 and will reach 140 million US\$ by the end of 2025, growing at a CAGR of 4.9% during 2018-2025.
