Abstracts

Anhydroxylitol was intended to deliver both quick and long-term hydration through the fermentation of wood and wheat. It is helpful in glycosaminoglycan production which is utilised to optimise the natural moisture conservation of the skin (GAGs, and chondroitin sulphate which help to retain skin moisture). It reduces loss of water by physiological evaporation while increasing the formation of ceramide barrier.

According to QYResearch's new survey, global Anhydroxylitol market is projected to reach US\$ 777.9 million in 2029, increasing from US\$ 533 million in 2022, with the CAGR of 5.6% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Anhydroxylitol market research.

The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States. More than one-third of the top 100 companies are headquartered in the United States, and 22.9% of the companies are located in France.
