## Abstracts

This report studies the global APET Film market status and forecast, categorizes the global APET Film market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

APET (Amorphous-polyethylene terephthalate) film is thermoplastic film which is produced by the extrusion processing of Polyethylene Terephthalate (APET) copolymer, a kind of thermoplastic polyester. APET Film is one kind of amorphous thermal plastics, which is composed of carbon, hydrogen and oxygen elements. It will not produce toxic gases in the process of APET incineration. Instead, the product of complete combustion includes only non-toxic steam and carbon dioxide gases.

MEA and China lead the production of APET for the time being. The two regions contributed about 50.09% production in 2016. Octal, Far Eastern New Century, Klöckner Pentaplast, Nan Ya Plastics, etc. are leaders in the APET industry. In fact, many manufacturer engaged in the production of APET have extended their industry chain actively. From the raw materials to the downstream products, many companies have developed related business in order to promote their business development. There is no doubt that PTA and MEG price fluctuations influence the price change of APET film largely. Also, more and more capacity of APET film has been released in the past few years. Downward price trend of raw materials (Especially As the amount of recycle PET increases, the usage volume of PET decreases) as well as intensified competition insider the industry will drive APET price to go down further in the near term. Also, profit of the whole industry is predicted to show the same trend as well.

The global APET Film market is valued at 4520 million US\$ in 2017 and will reach 7300 million US\$ by the end of 2025, growing at a CAGR of 7.1% during 2018-2025.
