Abstracts

APOL1 gene is a member of APOL gene family, which plays an important role in innate immunity, which is our body's built-in defense system to fight threats. Some variations in APOL1 gene cause damage to parts within the kidney. Damage to parts that filter blood can lead to severe kidney disease or ultimately kidney failure. An example of such an indication is focal segmental glomerulosclerosis (FSGS), which is a type of kidney disease that can be caused by APOL1 gene variations.

According to QYResearch's new survey, global APOL1 Mediated Kidney Disease market is projected to reach US\$ 1218.5 million in 2029, increasing from US\$ 812 million in 2022, with the CAGR of 6.0% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole APOL1 Mediated Kidney Disease market research.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic

has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
