Abstracts

Automated Fingerprint Identification Systems (AFIS) is a method in which fingerprints from individuals are stored as digital images in a database. Each fingerprint has features like arches, loops, and whorls that are unique to an individual. The current version of AFIS has been in use only for a few years and has revolutionized the way matches are made. Automated fingerprint identification systems are primarily used by law enforcement agencies for criminal identification initiatives, the most important of which include identifying a person suspected of committing a crime or linking a suspect to other unsolved crimes.

Firstly, as for the global Automated Fingerprint Identification Systems (AFIS) industry, the top three manufacturers have 7.74% revenue market share in 2015. The Japanese giant NEC, which has 62.01% market share in 2015, is the leader in the Automated Fingerprint Identification Systems (AFIS) industry. The manufacturers following are Morpho, 3M Cogent and Suprema, which respectively has 5.55%, 3.19% and 2.73% market share globally. The PU HIGH-TECH is the leader of China Automated Fingerprint Identification Systems (AFIS) industry.

Secondly, the revenue of world Automated Fingerprint Identification Systems (AFIS) sales market has a rising from 1597.30 m dollars in 2014 to 1808.28 m dollars. The reason causes this increase is the rising demand for the Automated Fingerprint Identification Systems (AFIS) products, which is the result of the spurring needs of downstream customers.

Thirdly, the downstream industries of Automated Fingerprint Identification Systems (AFIS) products are Government, Military, Banking & Finance, Hospitality & Health Care, Transportation and Mobile Payment Transaction. In the recent years, with the rising awareness of security, the enlargement of commercial spending and unsolved high rate of criminal, the consumption increase of Automated Fingerprint Identification Systems (AFIS) will be obvious. There is a huge potential need for the Automated

Fingerprint Identification Systems (AFIS). In the foreseeable future, the Automated Fingerprint Identification Systems (AFIS) products will show an optimistic upward trend.

Finally, although sales of Automated Fingerprint Identification Systems (AFIS) products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the Automated Fingerprint Identification Systems (AFIS) field hastily.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
