## Abstracts

Wafer mounting is a step that is performed during the die preparation of a wafer as part of the process of semiconductor fabrication. During this step, the wafer is mounted on a plastic tape that is attached to a ring. Wafer mounting is performed right before the wafer is cut into separate dies.

According to QYResearch's new survey, global Automatic Wafer Mounters market is projected to reach US\$ 169.3 million in 2029, increasing from US\$ 100 million in 2022, with the CAGR of 8.0% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Automatic Wafer Mounters market research.
