This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Automotive fuel tank is an important safety and functional part of vehicle. Automotive fuel tank is a separate cabinet assembly fixed in the motor vehicle, used to store fuel. An automotive fuel tank system consists of fuel tank, fuel pipes, fuel tank cap, pipe fittings and other kinds of ancillary equipment. Automotive fuel tank functions for oil storage, heat dissipation, bubble separation and impurities precipitation, etc.

With the fast increase of vehicle production, the automotive fuel tank industry developed fast in the recent years. Depending on the existing increase trend, the prospects of automotive fuel tank industry is good in next years.

The growth rate of vehicles production may be slow in Europe and US. While in Asian region, especially in China, the automotive fuel tank industry will get a large development due to the development of automotive industry. In recent years, companies like Inergy have established several plants in China to produce fuel tanks. In China, automotive fuel tank industry appears pattern of "Only one super Power and Multi-great Power". Manufacturers like Yapp have largely expanded their capacity in recent years. Once they make breakthrough in technology, the foreign manufacturers may lose large advantage.

The global Automotive Fuel Tank market is valued at 9430 million US\$ in 2017 and will reach 11400 million US\$ by the end of 2025, growing at a CAGR of 2.4% during 2018-2025.
