Abstracts

This report studies the global Automotive Glow Plug market status and forecast, categorizes the global Automotive Glow Plug market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Automotive glow plug is a part that assists during cold start. It creates ideal ignition conditions for the injected fuel to burn through electrically generated thermal energy that is brought into the combustion chamber. Glow plugs are used in diesel engines to help start the engine with low temperature, especially in the winter. Glow plugs can be divided into metal type and ceramic type based on the material. Now, some glow plugs can heat up to more than 1000° in seconds.

Europe is the largest market of glow plug. The diesel vehicles in Europe occupied more than 70% of the total amount of diesel vehicles in the global. And the weather in Europe is colder than other regions. So the demand of glow plug is largest.

In US, the total amount of vehicles is large, but the share of diesel vehicle is little. So the market of glow plug is smaller than in Europe. But the manufacturing technology is developed in US, so there are some major glow plug manufacturers like Borgwarner, Delphi and Federal-Mogul, all of which are the leading suppliers of glow plug in the world.

In China, there are many manufacturers of glow plugs. But both their capacity and technology have a large barrier with the international manufacturers like Borgwarner. Now, to meet the demand of domestic automotive industry, some foreign companies have built plants in China. To maintain the market share, Chinese glow plug manufacturers should spend more money and time on research and development.

The global Automotive Glow Plug market is valued at 30 million US\$ in 2017 and will

reach 40 million US\$ by the end of 2025, growing at a CAGR of 4.4% during 2018-2025.
