## Abstracts

This report studies the global Automotive Grease market status and forecast, categorizes the global Automotive Grease market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Grease is a liquid lubricant with a solid or semi-fluid thickener, such as soap or PTFE. Grease fulfills the same requirements as other lubricants – to reduce friction and wear, protect against corrosions, and to dissipate heat. Automotive Grease is used in bearings, joints, hinges and other components. Automotive grease avoids sticking and squeaking thus preventing components wearing out prematurely, whilst shielding against moisture and corrosion. Automotive grease consists of oil or other fluid lubricant that is mixed with a thickener, typically a soap, to form a solid or semisolid.

Considering the development of downstream industry, we estimate that the growth of automotive grease market size will continue to grow in the next five years with a 2.50% compound average growth rate to 2021.

EU, North America, China and Asia (EX. China) are the major consumption regions of automotive grease, for both passenger automotive and commercial automotive are quite mature in these regions.

The global Automotive Grease market is valued at 1000 million US\$ in 2017 and will reach 1130 million US\$ by the end of 2025, growing at a CAGR of 1.6% during 2018-2025.
