Abstracts

Hydrogen can be stored physically as either a gas or liquid. It typically requires high-pressure tanks (350-700 bar tank pressure).

According to QYResearch's new survey, global Automotive Hydrogen Storage Tank market is projected to reach US\$ 2393.5 million in 2029, increasing from US\$ 1356 million in 2022, with the CAGR of 8.6% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Automotive Hydrogen Storage Tank market research.

The global pressure vessel market is mainly concentrated in Europe and the United States, Japan and South Korea, India and China. Among them, the pressure vessel manufacturing industry in Europe, America and Japan has been in a leading position in the international arena, mainly producing medium and high-end products in the industry. China's pressure vessel industry is big but not strong, in terms of technical strength, product quality and other aspects of the international leading enterprises there is a certain gap. Investment growth in the energy and chemical sectors has driven the development of the pressure vessel industry in recent years, including the expansion of power generation capacity in the Asia-Pacific region and the increase in chemical projects in the Middle East. According to the '2022 BP World Energy Statistics Yearbook', the global energy exporters are mainly distributed in the Middle East, Russia, Africa, South America and Central America, energy importers are mainly distributed in Europe, China, India, other Asia-Pacific countries and North America, the regional development of the pressure vessel market will be further developed with the increase in regional energy imports.
