## Abstracts

Automotive Instrument Cluster is the array of gauges and warning lights directly in front when operating a car. Since the beginning of the 20th century, automotive instrument cluster has been a standard equipment of a car.

The automotive instrument cluster industry is relatively concentrated, the production of top ten manufacturers account nearly about 85% of global production. The high-end products mainly come from Europe and North America.

In the world wide, the plants of major manufactures mainly distribute in Europe and China, transnational companies, like Continental, Visteon and Denso, are the leading manufactures in the world. As to China, Feilo has become the leader of China domestic manufactures.

China is also the largest consumer of automotive instrument cluster. In 2015, the consumption of automotive instrument cluster is about 26700 K Units in China; its proportion of total global consumption exceeds 27%. India has witnessed a major chunk of the consumption of automotive instrument cluster in the South Asia region.

The import and export business of this industry is not very frequent. The main reason lies in that the automotive instrument cluster manufactures build factories in the main consumption countries.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
