Abstracts

This report studies the global Automotive Motor market status and forecast, categorizes the global Automotive Motor market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Motors are devices used to transfer or transform electric power according to the principle of electromagnetic induction. Automotive motors include various used in vehicles, such as powertrain motor, power seat motors, wiper motors, etc. Generally, a normal saloon car will equip about 20~30 motors and a luxury saloon car may need 3 times. For commercial vehicles, the amount of motors equipped is also more than 10. These automotive motors are very important to vehicles.

Automotive motors include various motors used in automotive, the product structure is chaos. The price of different type product is large. Enterprises like Mabuchi can supply several times of other company's production, but its production value is not as high as production in market share due to the low price.

As a high tech industry, the manufacturing technology of automotive motors is mature but only these international giants can supply the high end products with excellent performance. There is still a core technical barrier.

The automotive motors market concentration is rather high as the major manufacturer occupied large share of the market. International giants like Bosch, Asmo have built many factories around the world, especially in China, where the automotive industry developed fast and the market demand is larger and larger.

Facing the fierce competition, Chinese manufacturers should invest more on research and development to maintain and expand their market share. While these international giants should take measures like introduce new products, build new factories to hold their position in market.

The global Automotive Motor market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
