This report studies the global Automotive Night Vision Systems market status and forecast, categorizes the global Automotive Night Vision Systems market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Automotive night vision system (NVS) is an advanced driver assistance systems that help increase driver awareness when it's dark out. The system extends the perception of the driver beyond the limited reach of the headlights through the use of thermographic cameras, infrared lights, heads up displays, and other technologies. Since automotive night vision can alert drivers to the presence of potential hazards before they become visible, these systems can help prevent accidents.

Market competition is not intense. The production proportion of top 3 is 78.3% in 2015. Autoliv, Bosch, Delphi, etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry. With the development of society and the changing of consumer demand, the Automotive Night Vision Systems industry will be more and more popular in the future.

The global Automotive Night Vision Systems market is valued at 230 million US\$ in 2017 and will reach 710 million US\$ by the end of 2025, growing at a CAGR of 17.5% during 2018-2025.
