This report studies the global Automotive Solar Control Glass market status and forecast, categorizes the global Automotive Solar Control Glass market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Solar control glass is specially treated glass which is designed to keep car interiors comfortable by preventing the buildup of solar heat.

Solar control glass is not necessarily coloured or mirrored glass, although such finishes can be applied for aesthetic purposes if desired. It incorporates invisible layers of special materials on the glass which have the dual effect of allowing sunlight in, while repelling solar heat. Solar control glass units are typically doubleglazed, which means they also insulate well.

The global average price of Automotive Solar Control Glass is in the decreasing trend, from 26 USD/Pcs in 2011 to 23 USD/Pcs in 2015. With the situation of global economy, prices will be in decreasing trend in the following five years.

Europe region is the largest supplier of Automotive Solar Control Glass, with a production market share nearly 35% in 2016. North America is the second largest supplier of Automotive Solar Control Glass, enjoying production market share nearly 29% in 2016.

The global Automotive Solar Control Glass market is valued at 1030 million US\$ in 2017 and will reach 1600 million US\$ by the end of 2025, growing at a CAGR of 5.7% during 2018-2025.
