An axle is a part of the transmission assembly of an automobile. The main purpose of an axle is to bear the weight of the vehicle and also maintain the position of wheels relative to each other and to the vehicle body. Axles can either be live-axles or non-driving axles. In an automobile, live axles help in transmitting the power from engine on to wheels via the drive shaft.

The global average price of Axle Shaft is in the decreasing trend, from 63.48 USD/Unit in 2011 to 61.43 USD/Unit in 2015. With the situation of global economy, prices will be in decreasing trend in the following five years.
