Abstracts

Baby Nipples is a small projection near the center of the mammary gland containing the outlets of the milk ducts through which young mammals obtain milk from the adult female; It is typically used by infants and young children when a mother does not breastfeed, or if someone cannot (as conveniently) drink from a cup, for feeding oneself or being fed.

At present, in the foreign industrial developed countries the Baby Nipples industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the United States, Europe, Japan, etc. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost is competitive disadvantage, as the Chinese Baby Nipples production enterprise technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase .

Chinese Baby Nipples industry has developed into a national industry with certain research and production capacity, industry product mix has gradually improved, currently China has become international Baby Nipples large manufacture country, in addition to middle and low Baby Nipples products, some leading companies have been able to provide some high-end Baby Nipples products, has already had a competitive edge in the international arena.

With the rapid growth of the national economy as well as the rapid development of downstream industries, Chinese Baby Nipples market demand is exuberant; provide a good opportunity for the development of Baby Nipples market and technology.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field.

Along with the development of Chinese domestic equipment, Chinese domestic equipment has been very mature and advanced, and the performance distance has

been shortening compared with the imported equipment.

Although Baby Nipples brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
