Abstracts

This report studies the global Beryllium Hydroxide market status and forecast, categorizes the global Beryllium Hydroxide market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Beryllium hydroxide, $\text{Be}(\text{OH})_2$, is an amphoteric hydroxide, dissolving in both acids and alkalis. Beryllium Hydroxide is a white powder or crystalline (sand like solid). It is used in the production of beryllium and beryllium oxide. Beryllium (Be) is used as an alloy, oxide or metal in electronic components, electrical components, aerospace applications, defense applications, and other Applications.

USA is a key manufacturer of beryllium hydroxide who accounts for about 59.96% capacity market share in 2014. Meanwhile, it is also the largest consumer of beryllium hydroxide, accounting for 44.79% market share in 2014.

Compared with the international market, Chinese beryllium hydroxide still has a certain performance gap with company such as Materion Corporation. Chinese beryllium hydroxide manufacturers should be dedicated to improving their technology to promote the beryllium hydroxide industry development in domestic market. Moreover, these manufacturers can also be active to extend the beryllium hydroxide downstream industries, which can provide good support to their beryllium hydroxide businesses' development.

The global Beryllium Hydroxide market is valued at 370 million US\$ in 2017 and will reach 390 million US\$ by the end of 2025, growing at a CAGR of 1.0% during 2018-2025.
