## Abstracts

Beryllium is the lightest alkaline earth metal with atomic number 4. It is relatively rare in the universe. In this report, we just statistic pure beryllium metal.

The Beryllium industry concentration is relatively high; there are more very few manufacturers in the world, and high-end products mainly from America. In the world wide, American has a long history and unshakable status in this industry, like Materion Corp. In Kazakhstan, it is Ulba Metallurgical Plant, which leads the technology development. In China, the manufactures are located in Xinjiang and Hunan province. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Beryllium 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Beryllium 3900 industry.

Based on our recent survey, we have several different scenarios about the Beryllium 3900 YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ 74 million in 2019. The market size of Beryllium 3900 will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.

With industry-standard accuracy in analysis and high data integrity, the report makes a brilliant attempt to unveil key opportunities available in the global Beryllium market to
