## Abstracts

This report studies the global Biomass Briquette Fuel market status and forecast, categorizes the global Biomass Briquette Fuel market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Biomass pellet fuel is biofuels made from compressed organic matter or biomass. Wood pellets are the most common type of pellet fuel and are generally made from compacted sawdust and related industrial wastes from the milling of lumber, manufacture of wood products and furniture, and construction. Other industrial waste sources include empty fruit bunches, palm kernel shells, coconut shells, and tree tops and branches discarded during logging operations.

At present, in developed countries, the Biomass Fuel industry is generally at a more advanced level. The world's large enterprises are mainly concentrated in EU. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, and leading technical level. With the development of Chinese Biomass Fuel industry production technology, their share in the international market is increasing, and competitiveness in the international market gradually increases.

As Chinese overall economic downward trend in the past few years, in the next few years there will be many uncertainties, and coupled with Biomass Fuel industry situation in the past few years, the current demand for Biomass Molding Fuel product is relatively low. In the coming years, as the environmental standards are more and more strict, biomass fuel market is expected to witness the highest growth rate in the Asia-Pacific region. Although biomass Biomass Briquette Fuel brings a lot of opportunities, the study group recommends that the new entrants just having money but without technical advantages and upstream/downstream support should not to enter into this field.

The global Biomass Briquette Fuel market is valued at 6760 million US\$ in 2017 and will reach 12600 million US\$ by the end of 2025, growing at a CAGR of 8.1% during 2018-2025.
