Bioabsorbable scaffolds, or naturally dissolving stents, that have been investigated include base materials that are either metals or polymers. Those that have been approved in markets around the world and thus have gained the most traction are based on polymers that are similar to those used in dissolvable stitches.

In the last several years, global market of bioresorbable vascular scaffold developed rapidly, with an average growth rate of 13%. In 2016, global revenue of bioresorbable vascular scaffold is nearly 127 M USD; the actual consumption is about 75 K units. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Bioresorbable Vascular Scaffold 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
