According to QYResearch's new survey, global Bulk Baijiu market is projected to reach US\$ 405.8 million in 2029, increasing from US\$ 287 million in 2022, with the CAGR of 5.7% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Bulk Baijiu market research.

In recent years, China's mid-to-high-end liquor market has been developing well, and the proportion of revenue has continued to increase. However, there is still a certain gap compared with developed countries, and it has great potential for development in the future. After a period of industry adjustment, the liquor consumption structure shifted from government consumption to mass consumption. While the consumption structure is changing, the income level of residents is constantly increasing, and the ranks of the middle class are constantly growing. Under the market environment of increasing consumption level and upgrading consumption structure, there are definite development opportunities in China's mid-to-high-end liquor market, and the market share is expected to further move closer to leading enterprises.
