Abstracts

This report studies the global Carbon Textile Reinforced Concrete market status and forecast, categorizes the global Carbon Textile Reinforced Concrete market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Carbon fibers are from the most recent & probability the most spectacular addition to the range of fiber available for commercial use. Carbon fiber comes under the very high modulus of elasticity and flexural strength. These are expansive. Their strength & stiffness characteristics have been found to be superior even to those of steel. But they are more vulnerable to damage than even glass fiber, and hence are generally treated with resin coating.

Carbon Textile Reinforced Concrete is one type of Textile Reinforced Concrete which is made by carbon fiber.

The world Carbon Textile Reinforced Concrete production market will still have a certain amount of growth owing to the increasing of demand. The market in developed countries will have some growth and the market in developing countries will have a faster growth rate. The world Carbon Textile Reinforced Concrete production will increase at a growth rate of about 5.5%. The main consumption region will be in North America, Europe, Japan and China.

The global Carbon Textile Reinforced Concrete market is valued at 19 million US\$ in 2017 and will reach 27 million US\$ by the end of 2025, growing at a CAGR of 4.9% during 2018-2025.
