Abstracts

Food grade CBD is fast gaining worldwide popularity. Inclusion of CBD in food and drinks in the US is picking-up so fast that the US FDA is currently debating regulatory frameworks for consumer products.

According to QYResearch's new survey, global CBD Snack market is projected to reach US\$ 1696 million in 2029, increasing from US\$ 712.5 million in 2022, with the CAGR of 13.2% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole CBD Snack market research.

The CBD Snack market is being driven by the growing consumer interest in wellness and natural health remedies. CBD-infused snacks are gaining popularity due to their potential therapeutic benefits, such as stress reduction, pain relief, and improved sleep. The increasing legalization of cannabis and the changing perception of CBD as a non-psychoactive compound contribute to the market's growth. Moreover, the convenience and discreet nature of CBD snacks make them an attractive option for consumers seeking on-the-go relaxation. However, challenges include regulatory uncertainties surrounding CBD products, variations in product quality and potency, and consumer skepticism about its effectiveness. Building trust, educating consumers, and adhering to evolving regulations will be crucial for the sustainable growth of the CBD snack market.
